# ***Why Laser Sights?***

Laser aiming technology has advanced rapidly in recent years — evolving from bulky and expensive high-tech gadgets to reliable and practical handgun sighting devices. Whether you own a handgun for self-defense, law enforcement or recreation, a well-designed laser sight can dramatically speed target acquisition and improve your accuracy under even the toughest conditions.

At Crimson Trace, we believe you should always be able to sight and shoot a handgun without a laser. This new technology was never meant to replace your fixed sights, but to supplement them in difficult situations — like firing on the move or from awkward positions, defending yourself in close quarters, aiming in low light where iron sights are difficult to see, and any time that you're under stress. Our natural and automatic reaction is to focus on the threat, not the gun-sights. Under these conditions, a laser can make all the difference.

**Of course, not all laser sighting systems are created equal.**

# Why Lasergrips?

*LASERGRIPS give you an immediate and decisive advantage no other handgun accessory can equal.*

- **Instinctive, instant laser control**

Just grip your gun naturally, and the laser comes on. No on/off switch to find. No extra button to push. No fumbling when seconds count.

- **Lightning-fast target acquisition**

LASERGRIPS' clear, bright long-lasting laser beam puts you on target at the speed of light — helping you shoot faster and more precisely than you ever thought possible with a handgun.

- **Repeatable pinpoint accuracy**

Unlike other laser systems, LASERGRIPS offer full windage and elevation calibration for tack-driving accuracy time after time.

- **Broadened field of vision**

Now you can confidently focus on the target instead of the gun — our natural reaction whenever we're under pressure. In competition, that means faster target-to-target transition. In an attack, it could literally mean the difference between walking away or losing your life.

- **Proven as a less-than-lethal alternative**

The powerful presence of LASERGRIPS in self defense and law enforcement encounters has frequently de-escalated the threat and eliminated the need to shoot.

*Clear, Brightest Laser Beam Available*

*Full Windage and  
Elevation Calibration —  
repeatable pinpoint accuracy*

*Instant Activation Switches —  
perfectly positioned for control of  
the laser, whether you shoot right

Only the Finest Components Available —  
produces the most reliable system with affordable  
battery replacement*

*Master On/Off Switch*

*Completely Weatherproof —  
unsurpassed reliability in all conditions*

# 1911 WRAP AROUND

Incorporating the best ideas from firearms experts, elite military units and law enforcement professionals, we've created a new generation of Lasergrips. They conceal revolutionary laser technology inside a classic double diamond styling that's unmistakably reminiscent of the venerable 1911. True to form. True to the needs of today's gun owner. Cutting-edge stock technology gives you the comfort of rubber overmold combined with smooth, snag-free side panels for easy draw and quick grip registration. Dual activation buttons allow for instinctive, ambidextrous and instant fingertip control. Ambi-safety compatible, Crimson Trace offers replacement safeties for these models or advice on how to modify your ambi-safety to accommodate the grips.

## **LG-304**

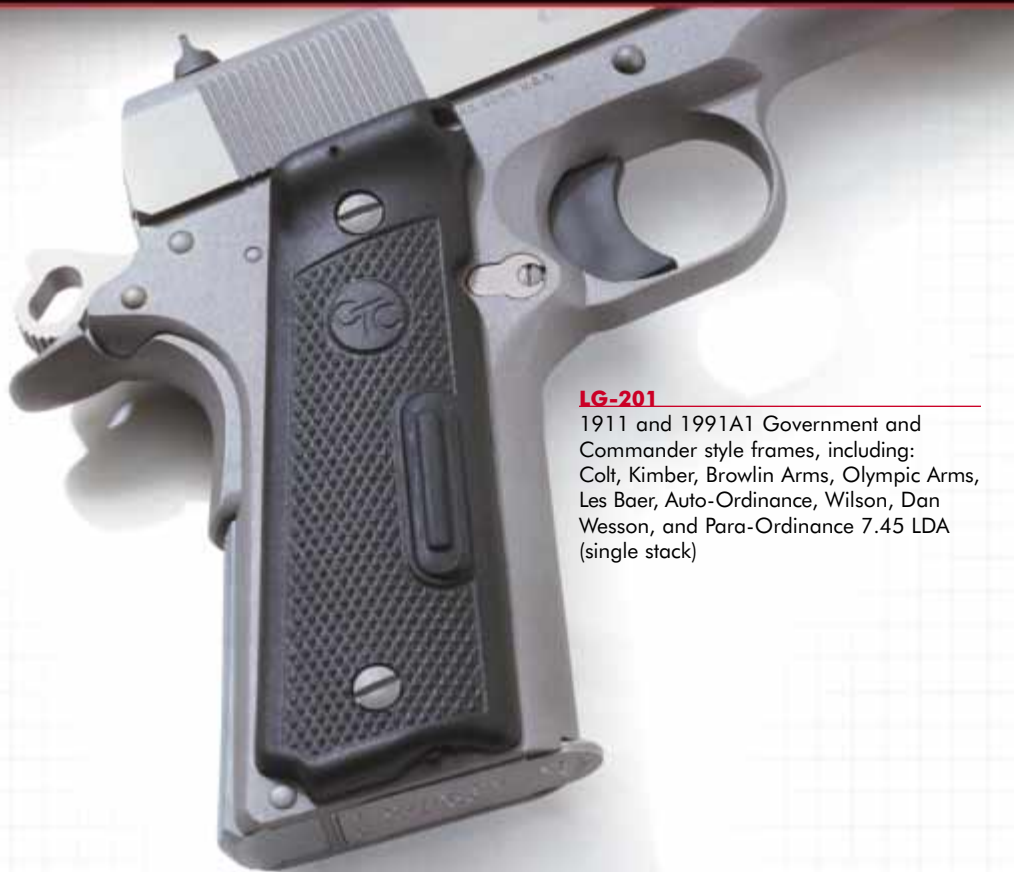

Colt 1911 Officers and Defender style frames including: Kimber 1911 Compact, Ultra Carry and Ultra Elite, Springfield 1911 Compact, V10, and Ultra Compact (single stack only)

## **LG-301**

1911 and 1991A1 Government and Commander style frames including: Colt, Springfield, Kimber, Browlin Arms, Olympic Arms, Les Baer, Auto-Ordinance, Wilson, Dan Wesson, and Para-Ordinance 7.45 LDA (single stack)

# 1911 TRADITIONAL STYLE

*These original side-panel Lasergrips are ergonomically and aesthetically designed to retain the overall look and feel of vintage 1911 and 1991A1 government and commander size pistols. Like all models from Crimson Trace, they are easy to install, adjustable for windage and elevation, and feature an activation system unequaled by any other laser sighting system on the market. Instinctively activated with your right or left hand, these grips provide immediate target acquisition with repeatable pinpoint accuracy giving you the power to succeed at survival.*

## **LG-201**

1911 and 1991A1 Government and Commander style frames, including: Colt, Kimber, Browlin Arms, Olympic Arms, Les Baer, Auto-Ordinance, Wilson, Dan Wesson, and Para-Ordinance 7.45 LDA (single stack)

# PERSONAL PROTECTION

## **S&W J-Frame Combat Overmold**

Empower yourself with the new Combat Overmold Lasergrips for Smith & Wesson J-Frame revolvers. Intended specifically for recoil control and maximum comfort, this design features rubber overmold throughout the grip and a modestly contoured longer grip design for fast registration and natural aim. This model also boasts a master on/off switch for complete system override. Now you're ready for anything.

## **J-Frame Original Grips**

Designed specifically for Law Enforcement backup, with smooth draw and tight lines for the ultimate in concealed carry protection. This is the only Lasergrips model without a master on/off switch so the laser is always ready for lightning fast activation and sudden aim — changing the rules in accuracy for your J-Frame.

### **LG-205**

S&W J-frame (small frame) revolvers, round butt, including: Airlight, Airweight, Bodyguard, Chiefs Special, Centennial, Ladysmith, models 36, 37, 38, 49, 60, 63, 317, 331, 332, 337, 340, 342, 360, 442, 637, 638, 640, 642, 649, 651 and 940

### **LG-305**

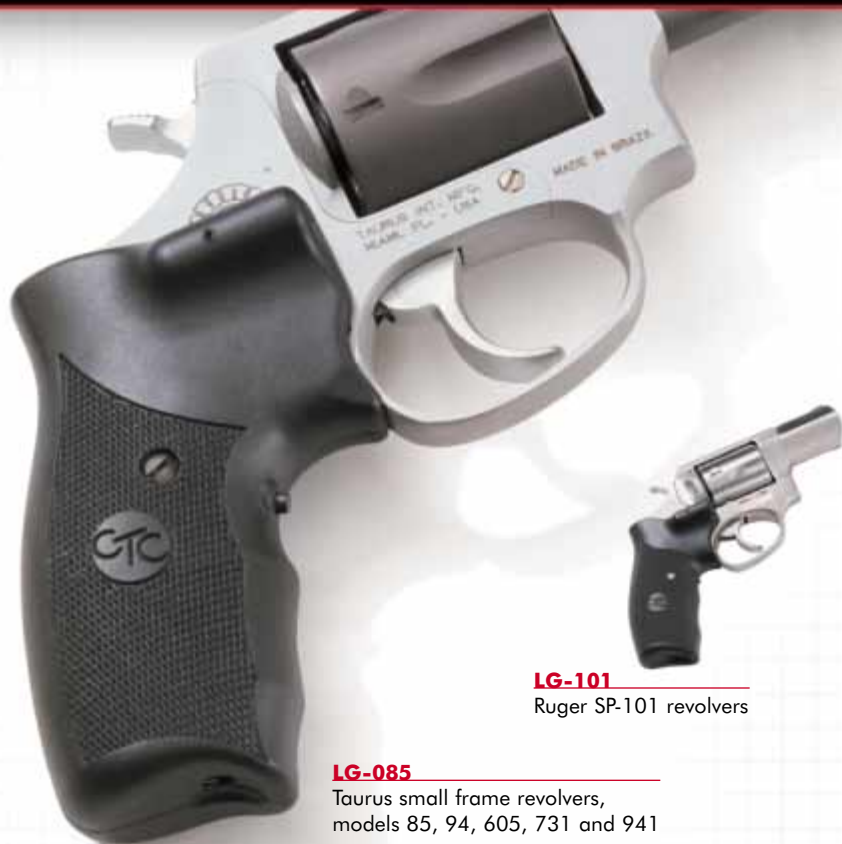

S&W J-frame (small frame) revolvers, round butt, including: Airlight, Airweight, Bodyguard, Chiefs Special, Centennial, Ladysmith, models 36, 37, 38, 49, 60, 63, 317, 331, 332, 337, 340, 342, 360, 442, 637, 638, 640, 642, 649, 651 and 940

# **CTION REVOLVERS**

## **Taurus 85/Ruger SP101**

Both of these grips are styled around a traditional combat grip design to provide comfort and recoil control, but with a more discrete profile sized for conceal carry or back-up use. A blend of strategically placed fine checkering and smoothly contoured surfaces maximize grip retention while providing snag free carry and draw. Knowing that the short target radius of these revolvers can be difficult to aim and fire accurately, we guarantee improved and optimum accuracy when using a laser with this style handgun.

Now, this is confidence.

**LG-101**

Ruger SP-101 revolvers

**LG-085**

Taurus small frame revolvers,  
models 85, 94, 605, 731 and 941

# **BERETTA 92/96 WRAP AROUND**

Three years in development, these new Lasergrips are designed to meet the stringent demands and rugged duty requirements of law enforcement and the military. This exciting new Beretta model features a nearly full rubber overmold grip for unsurpassed comfort and recoil control. Dual activation switches fit precisely under your fingertips, and double palm swells and slim-line styling are sure to please shooters from all backgrounds and grip techniques. An ergonomically placed master switch incorporates space-age technology to provide quick, reliable activation for duty use. High tech. High touch.

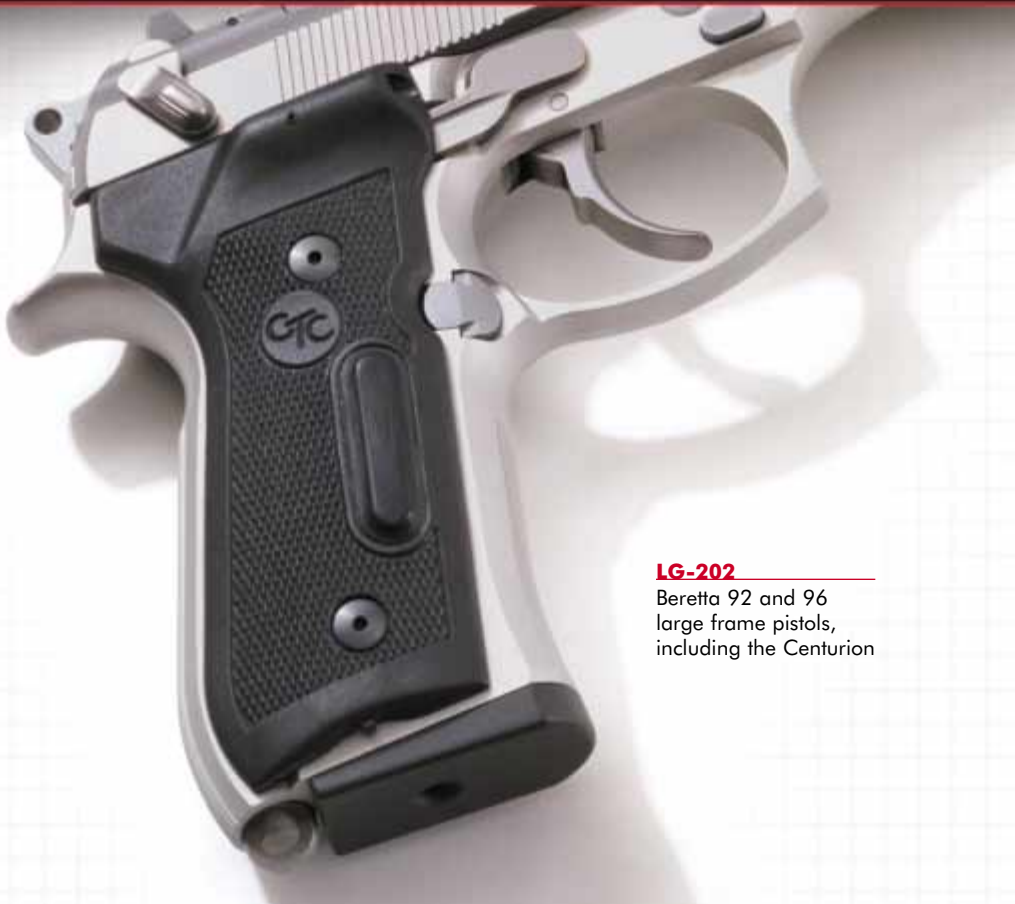

## **LG-302**

Beretta 92 and 96  
large frame pistols,  
including the Centurion

# **TRADITIONAL BERETTA 92/96 GRIPS**

For the more traditional Beretta shooter, Crimson Trace offers a straightforward Lasergrips design similar to the original factory grip panels. Perfect for home defense and recreational shooting, these polymer replacement stocks feature a master on/off switch for complete system override, instinctive pressure activation pad, and are fully adjustable for windage and elevation. No matter which style of Beretta grips you choose, with Lasergrips, you are in control when the action starts.

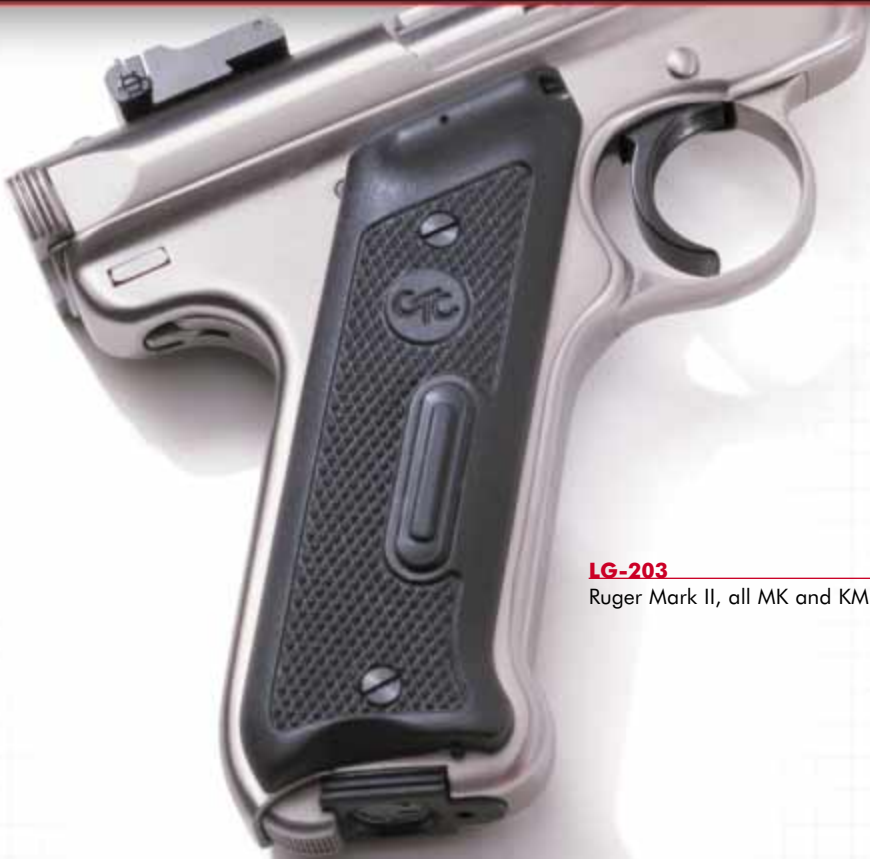

## **LG-202**

Beretta 92 and 96  
large frame pistols,  
including the Centurion

# **RUGER MARK II**

Turn your Ruger Mark II pistol into a "tack driver" with the most advanced sighting technology on the market. Lasergrips give varmint sportsman and recreational shooters alike instant target acquisition with pinpoint accurate shot placement making even the smallest targets fair game. These grips are rugged in design, maintain accuracy through thousands of rounds fired, and are easily activated by right or left handed shooters. Take no chances on missed shots. With Lasergrips, you're in control.

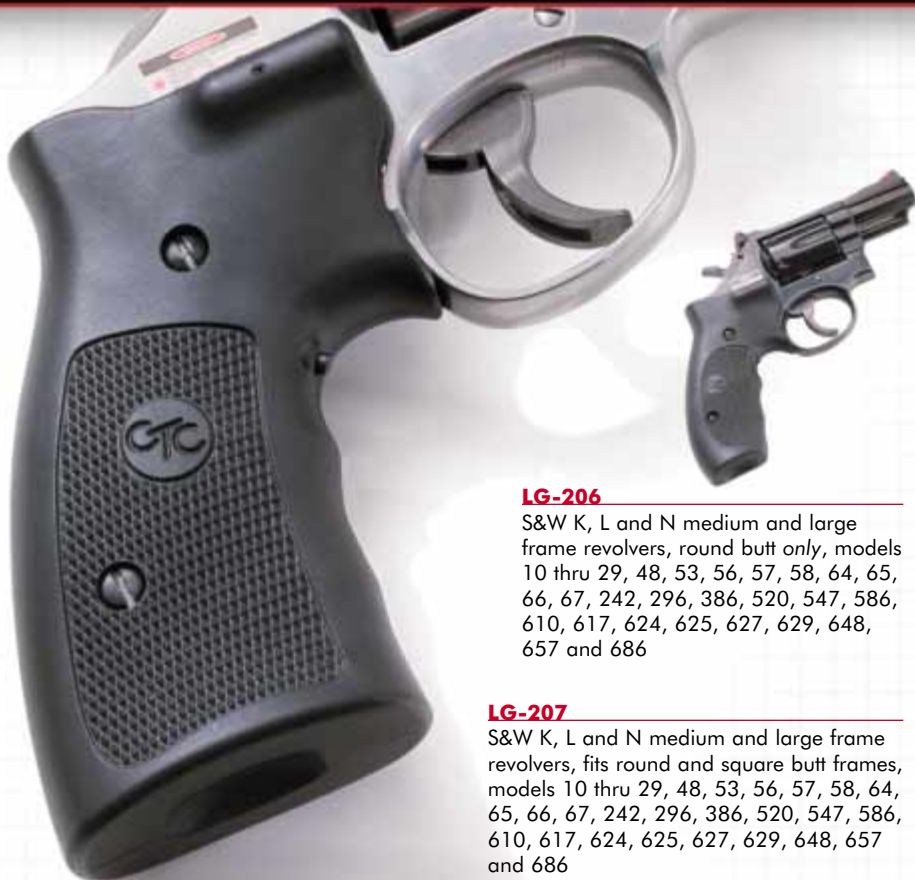

## **LG-203**

Ruger Mark II, all MK and KMK models

# **SMITH & WESSON K,L,N FRAME REVOLVERS**

Whether you use your time-honored six-shooter for hunting or self-defense, taming your world becomes natural with the addition of Lasergrips to your standard iron sights. Instant laser activation with your normal shooting grip dramatically speeds target acquisition improving the odds of bringing down that trophy buck as well as your time between shots fired. Lasergrips promise pinpoint accuracy and have been tested through thousands of rounds up to 44 Magnum in recoil. Available in both round and square butt models, they are powerful friends to have on your side.

## **LG-206**

S&W K, L and N medium and large frame revolvers, round butt only, models 10 thru 29, 48, 53, 56, 57, 58, 64, 65, 66, 67, 242, 296, 386, 520, 547, 586, 610, 617, 624, 625, 627, 629, 648, 657 and 686

## **LG-207**

S&W K, L and N medium and large frame revolvers, fits round and square butt frames, models 10 thru 29, 48, 53, 56, 57, 58, 64, 65, 66, 67, 242, 296, 386, 520, 547, 586, 610, 617, 624, 625, 627, 629, 648, 657 and 686

# **SIG SAUER P226/228/229**

Even as elite and reliable as the Sig Sauer pistol stands in its own right, imagine adding the formidable advantage of a laser sight to an already perfect package. Repeatable pinpoint accuracy and target acquisition at the speed of light give you an edge that no other handgun accessory on the market can provide. Fully adjustable for windage and elevation, Lasergrips for Sig Sauer pistols are simple to install and sight in. And, consistent with the full Lasergrips line, they are easily activated with a right or left handed grip, have no special holstering requirements, and feature a master on/off switch for complete system override. Serious attitude for your Sig Sauer.

## **LG-229**

Sig Sauer P228 and P229

## **LG-226**

Sig Sauer P226

# **GLOCK LASER SYSTEM**

Turn your Glock into the ultimate self-defense solution. Let the highly-skilled technicians at Crimson Trace custom-install state-of-the-art Lasergrips technology into your existing Glock frame. Repeatable pinpoint accuracy and dynamically fast target acquisition turn your Glock into a reliable workhorse that will transform the way you use your handgun. A master on/off switch — for complete system over-ride — is optional, and all systems are bore-sighted in our factory for perfect shot placement time after time. The system also comes with an unconditional warranty from Crimson Trace that works hand-in-hand with your Glock warranty for a superior package you can depend on... day in, day out.

## **GLS630**

All Glock models (except 29, 30 and 36)
